Typical product characteristics:

Light colors show staining and denim abrasion faster and more clearly than dark colors. In combination with dark or intense shades, color migration/color transfer may occur. Dark and intense colors tend to show color abrasion. Pilling is unavoidable and can also occur due to the adhesion of foreign fibers. A slight stripe effect may occur due to the material characteristics. Minor color and structural deviations between production batches are unavoidable and may occur. A certain degree of fading due to exposure to light or abrasion is inherent to the nature of the fabric. Every velour fabric will flatten with use, making changes in pile layers and seating marks unavoidable. Shimmering/color shifts depending on light incidence are characteristic of velour. Velour fabrics are sensitive to scratches and pressure, which may lead to pile loss.

CLEANING INSTRUCTIONS

Daily care and at-home cleaners can keep your fabric looking beautiful for years. In the case of a spill, stain, or general wear and tear, follow our tips on how to clean a fabric.

For cleaning you need distilled water and a ph neutral shampoo.

You need a white, clean and soft cotton cloth. Use this to remove the stain in circular motions and allow the area to dry.

Cleaning only with the vacuum cleaner nozzle.
